BPS Projects Ltd specialise in Environmental Water Treatment Technologies and are the exclusive UK distributors for VRTX Non chemical water treatment systems.

The VRTX system eliminates the use of water treatment chemicals for the treatment of evaporative condensers and cooling towers. The oxidant based disinfectant produced is safe to handle whilst being extremely effective at controlling Legionella and biofilm growth in hot and cold water systems.

BPS offer nationwide HSE ACOP L8 service and equipment maintenance contracts from our East Midland headquarters.

BPS Projects Ltd have been established for over 30 years and prides itself on its ability to carry out project work from simple installations of individual VRTX systems to large bespoke projects for multinational companies. The in house project team include electrical, mechanical, water treatment and project management engineers mean that we can offer a full design service.

BPS Projects are registered member of the Legionella Control Association Code of Conduct

Scheme. The code of conduct is a voluntary code which sets out service provider commitments for companies offering Legionella control services. Compliance demonstrates that the service provider has the necessary policies and management structures in place comply with the requirements legionellosis regulations and legislation.
